

PRODUCT SERIES

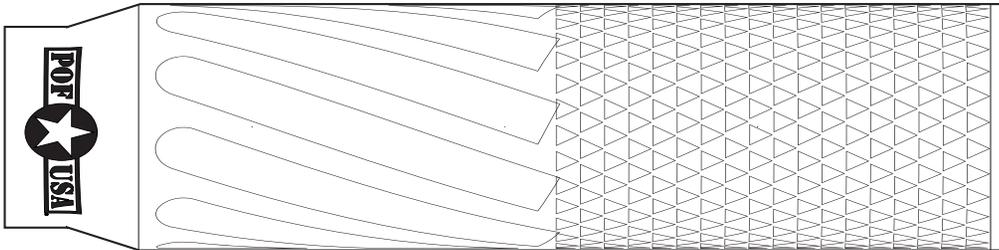

# PST-7 SUPPRESSOR

MODEL

## PATRIOT SUPPRESSION TECHNOLOGY

AVAILABLE CALIBERS

## 7.62

### ABOUT PST-7

3D printed monolithic design using Titanium Ti6Al4V, the PST-7 is a light weight suppressor with extremely low back pressure. The PST-7 provides the operator with sound, recoil, and flash mitigation for any 7.62mm weapon system.

### STANDARD FEATURES

Monolithic Titanium Ti6Al4V

3D-Printed Design

1.375-24 HUB Compatible

High-temp Cerakote

Modular HUB Mount designed for PST-QD Muzzle Devices

### SPECS

OAL	6.43 in
Weight	16.8 oz
Body Material	Titanium Ti6Al4V
Finish	High-temp Cerakote
Attachment	1.375-24 PST HUB Adapter
Available Colors	Black

## TECHNOLOGY

The PST-7 utilizes a three chamber, forward venting, monolithic design to reduce the mach pressure produced when firing the host weapon system. This design helps manage the cyclic rate of the host weapon system, while the forward exhaust ports help prevent gas blow back in the operators face. The PST-7 is protected by a high-temp Cerakote coating, features our PST HUB Adapter, and includes a 762 PST-QD Flash Hider.
